WCAG 2.1 Level AA Success Criteria

COMPLIANCE AUDIT

For www.ingatestone-fryerningpc.gov.uk/ | Verdict: Compliant

accessiBe is the web accessibility **market leader**, powering the accessibility of **tens-of-thousands** of websites, from **small businesses** to industry-leading **enterprises**.

This audit evaluates the adherence level of www.ingatestone-fryerningpc.gov.uk/ as of October 23, 2020, to the "Web Content Accessibility Guidelines" (WCAG) 2.1 level AA success criteria.

WCAG 2.1 AA Level Web Accessibility Audit

Website: www.ingatestone-fryerningpc.gov.uk/ | **Verdict:** Compliant | **Date:** October 23, 2020

Below you'll find the results for dozens of tests that focus mainly on 3 categories: **screen-reader** adjustments (for blind users), **keyboard navigation** adjustments (for the motor impaired) and **UI, design, and readability** adjustments (for the visually impaired).

#	Requirement	Relevant	Successes	Failures	Score
1	Menu items that have a dropdown menu include an "aria-expanded" attribute that equals to "false" that changes to "true" and back when opening or closing the dropdown.	No	0	0	-
2	Menu items that have a dropdown menu include an "aria-haspopup" attribute that equals to "true".	No	0	0	-
3	Menus should either be built using the HTML5 "nav" element or include a "role" attribute that equals to "menu" or "navigation" to indicate a navigation landmark for screen-readers.	Yes	6	0	100%

Code snapshots of some of the successful elements

4	Interactive elements that can be navigated using the keyboard should be surrounded by a visual outline whenever they are focused.	Yes	Pass	-	100%
5	Active popups should include an "aria-modal" attribute that equals to "true", and a "role" attribute that equals to "dialog", so screen-reader users know how to navigate within it.	No	0	0	-
6	Interactive elements such as links, buttons and form fields should all be navigable using the keyboard by either using a focusable element (a, button, input, etc.) or including the "tabindex" attribute that equals to "0".	Yes	Pass	-	100%
7	Elements that are hidden using CSS manipulations (opacity, height, text-indent, off-canvas, etc.) should be wrapped inside an element with an "aria-hidden" attribute that equals to "false", or include it directly, and have it dynamically changed to "true" when they become visible.	Yes	Pass	-	100%
8	Every page should include hidden links that by clicking on them (either using keyboard navigation or a screen-reader), the user will "skip" certain blocks directly to main landmarks such as main content, menu or footer.	Yes	Pass	-	100%

28	A common accessibility mistake is to treat carousels as live regions using the "aria-live" attribute and the "polite" or the "assertive" values. Using this practice will cause screen-readers to cut and skip announcements.	No	0	0	-
----	---	----	---	---	---

29	Carousels should include an "aria-label" attribute that equals to "carousel"/"slider" or something else that indicates the functionality, as well as be tagged as a landmark for screen-readers using a "role" tag that equals to "contentinfo".	Yes	Pass	-	100%
----	--	-----	------	---	------

WCAG 2.1 AA Level Web Accessibility Audit

Website: www.ingatestone-fryerningpc.gov.uk/ | Verdict: Compliant | Date: October 23, 2020

Code snapshots of some of the successful elements

- `<ul class="uk-slideshow uk-overlay-active" role="region" " aria-label="Carousel" ><li style="min-height: 300px;"> <div...`

30	Control elements such as next and previous icons should include an "aria-label" attribute or a screen-reader only text that explains the functionality to screen-readers.	No	0	0	-
31	Carousel pagination items (usually used as small dots at the bottom of the carousel) should indicate their functionality and slide number they control using an "aria-label" and a screen-reader only text.	No	0	0	-
32	Tables that are being used as layout structures should include a "role" attribute that equals to "presentation" to indicate to screen-readers that it is not really a table.	No	0	0	-
33	If nested tables are used (a table element within a table cell), set the nested tables "role" attribute to "presentation".	No	0	0	-
34	Tables that are missing a THEAD row with TH elements, should include a "role" attribute that equals to "rowheader" on the TD elements of the TR that represents the visual table headings.	No	0	0	-
35	Font sizes should be at least 11px in size in order to stay readable in the majority of font families. This should be verified also when using dynamic units such as REM or percents.	Yes	Pass	-	100%
36	Letter spacing should not be set to below -1px in order to stay readable in the majority of font families. This should be verified also when using dynamic units such as REM or percents.	Yes	Pass	-	100%

WCAG 2.1 AA Level Web Accessibility Audit

Website: www.ingatestone-fryerningpc.gov.uk/ | Verdict: Compliant | Date: October 23, 2020

37	Elements that have texts should meet a minimum contrast ratio of 4.5:1 between their foreground (usually text color) and background color.	No	0	0	-
38	Required form fields should include an "aria-required" attribute that equals to "true" so blind users using screen-readers know their validation.	No	0	0	-
39	Search forms should include a "role" tag that equals to "search" (or be wrapped by one) to indicate a search landmark for screen-readers.	Yes	Pass	-	100%

Code snapshots of some of the successful elements

- `<form id="search-40" class="uk-search" action="/" method="post" role="search" data-uk-search="{source':
